

Amendments to the Specification

154

Cal 3.9.07

Please replace paragraph [00153] with the following amended paragraph:

[00153] A first alternative embodiment for client 112 may be practiced by employing a wearable client device. In this embodiment, display [[129]] 139 may be comprised of a wearable display, also referred to as a heads-up display in the art. A wearable display may be fastenably attached to, or embodied in, a hat or eyeglasses worn by a user; or, the wearable display may be suspended in front of a user's eye using a suspension means fitted over the user's head. In a wearable embodiment, user inputs may be conveyed to conventional processing hardware and software in client 112 using voice commands, sensors attached to a user's fingers, conventional eye movement detectors, or the like. In addition, processing hardware may be embodied in or attached to a user's clothing in the wearable embodiment.
